DETAILED ACTION

Claim 9 has been considered.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/23/05 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Robinson, U.S. Patent No. 5,522,075.

As per claim 9, the applicant describes a method comprising the following limitations which are met by Robinson:

a) running guest software in a processor mode that enables the guest software to operate at a privilege level intended by the guest software (Col 14, lines 12-15);

b) identifying an attempt of the guest software to perform an operation restricted by said processor mode (Col 12, lines 50-53);

Art Unit: 2137

c) determining whether the attempt of the guest software would succeed if the guest software was running outside said processor mode (Col 12, lines 20-53);

d) allowing the guest software to attempt the operation if the attempt of the guest software would not succeed if the guest software was running outside said processor mode (Col 12, lines 20-53);

e) exiting said processor mode to transfer control over the operation to a virtual machine monitor running outside said processor mode if the attempt of the guest software would succeed if the guest software was running outside said processor mode (Col 12, lines 50-60).

Response to Arguments

Applicant's arguments, filed 11/23/05, with respect to claim 9 fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

Conclusion

This action has been made non-final.
